Cell Number: +20 1009266353 | +201552460600

---

## SUMMARY

I am **Farid**, a passionate **software developer** specializing in **.Net developer**.

I focus on creating attractive, user-friendly **interfaces** and building efficient **web applications** using **ASP.NET Core** and **Entity Framework Core**.

I enjoy solving real-world problems, learning new technologies, and working in environments that promote creativity and growth.

I believe in diversity, justice, and equality, and aim to deliver software solutions that make a real difference.

Currently.

---

## TECHNICAL SKILLS & EXPERTISE :-

**C#**

**JavaScrip**

**Bootstrap**

**CSS3**

**Object-Oriented Programming (OOP)**

**Problem Solving**

**Git & GitHub**

**ASP.NET Identity**

**Role-based Permissions**

**Razor Pages**

**AJAX**

**T-SQL**

**Windows Hosting**

**Solid Principles**

**E-commerce System Development**

**Responsive UI Design**

**Design Patterns**

**ASP.NET Core**

**jQuery**

**HTML5**

**LINQ**

**Clean Code**

**MVC Architecture**

**.Net**

**Claims-based Authentication**

**Action Filters**

**RESTful APIs**

**Debugging and Troubleshooting**

**SQLite**

**IIS**

**Bot Automation**

**Admin Panel Development**

**Multilingual Support**

**Software Architecture**

---

---

## Courses Taken :-

- **Digital Egypt Pioneers Initiative – .NET Track (2024) :**  
A prestigious scholarship provided by the Egyptian Ministry of Communications and Information Technology, focusing on advanced .NET technologies. The program emphasized practical training in software development, clean architecture, and real-world project implementation. It also included modules on freelancing skills, English language proficiency, and soft skills development

---

## Projects :-

### **LapShop\_Project – Online Store for Laptops & Computer Parts**

#### **Overview:**

**LapShop\_Project** is a full-featured e-commerce platform focused on selling laptops and computer components such as RAM, hard drives, and accessories. It was developed using ASP.NET Core and Entity Framework Core with a responsive, user-friendly interface.

**GitHub :** [LapShop Project](#)

### **Employee Management System – CRUD Operations & Clean Architecture**

#### **Overview:**

**A system for managing employees and managers using clean code principles and reusable logic layers.**

**GitHub :** [Employee Management](#)

---

## EDUCATION :-

- **Al-Azhar University** – Faculty of Islamic Studies.
- **Computer Science Studies (Self-Learning)**  
*Completed multiple practical courses in software engineering, web development, and clean code practices through platforms.*

---

## LANGUAGES :-

- **Arabic** – Native
  - **English** – Above Beginner (Actively improving through technical Courses, daily practice, and exposure to programming content, i'm still learning).
-
